

FRANÇOIS HANNES

Congratulations on your purchase!

Francois Hannes, He gets his inspiration from life. He does not choose the middle ground, but goes for the extreme. This is reflected in his designs. The dynamics of a metropolis or the tranquility of a landscape and small things from nature. The pleasure of good food and drink. Business trips and holidays with his family. Important stimuli from which he draws energy and ideas.

Product specifications

Material **LIE DOWN** is a hand-tufted rug collection made of 80% New Zealand Wool and 20% Linen. The fibers are products of nature and as with all natural products, a slight deviation in texture and colour may occur between dye lots.

Maintenance

It's important to vacuum the rug often, in order to clean it and also to recover the pile, which might present some height differences due to high people traffic and wear. It's also important that rugs are turned regularly, so that the effects caused by light and normal wear might be equivalent in the whole surface of the rug. When there is furniture placed on the rug exercising pressure, a rug protection can be used so it won't damage the pile and the overall look of the product.

Regular cleaning is essential to maintain the appearance of your rug. Use a good vacuum cleaner, which should have 1200W of power and vacuum in the direction of the pile. New Zealand Wool/Linen rugs must be cleaned regularly. Naturally, lighter rugs need to be cleaned more often than darker ones. Steam cleaning or any other methods which involve a substantial increase of temperature are not recommended. For New Zealand Wool rugs we recommend water cleaning (water temperature cannot be higher than 30°). For a deeper cleaning, please use a specialized rug cleaning company.

Colour

Because of the nature of the quality each rug has its unique colour. The colour may differ and depend on each dye bath. Always avoid direct sunlight. Longer periods of exposure to direct sunlight will damage the rug and lead to discolouring.

Size deviation

Size deviations are up to about 3% possible. Because of the nature of this quality, this product can stretch a little bit.

Pile weight New Zealand Wool (kg/m²)

3

Total weight New Zealand Wool (kg/m²)

3,5

Colour fastness to light New Zealand Wool

4-5

Colour fastness to water New Zealand Wool
