REMY MEIJERS

Congratulations on your purchase!
Born in 1974, Remy Meijers has established himself as an internationally acclaimed designer with a refined focus on high end interiors, architecture and product design. Educated in Interior Architecture at the University of the Arts (HKU) in Utrecht, Meijers has built a reputation for creating spaces that radiate harmony and understated luxury.

His signature style is serene, timeless and meticulously balanced. It can be experienced in some of the most exclusive projects, including the interior design of the five star hotel The Dylan in Amsterdam.

Beyond interiors, Meijers works with leading international brands on everything from glassware and furniture to creative direction. He has partnered with renowned names such as Borek, Nilson and Cosentino. In addition, he has published two books and shared his vision with a wide audience through the Dutch television program RTL Woonmagazine.

About the design
This design is a subtle interpretation of the raw beauty of the African Sossusvlei. Inspired by a journey through Namibia, the rug reflects the contrasts of the landscape: the rugged structures of the dry earth and the shifting elevations that define its character. These elements merge into a soft and inviting texture. Just as the dunes move with the play of light and shadow, the rug adds a gentle sense of dimension to any interior.

Product specifications

Material   **Ozzy** is a hand-tufted rug collection made of Tencel and Thin wool. The fibers are products of nature and as with all natural products, a slight deviation in texture and colour may occur between dye lots.

Colour
Because of the nature of the quality each rug has its unique colour. The colour may differ and depend on each dye bath. Always avoid direct sunlight. Longer periods of exposure to direct sunlight will damage the rug and lead to discolouring.

Size deviation
Size deviations are up to about 3% possible. Because of the nature of this quality, this product can stretch a little bit.

Maintenance
Tencel and Thin Wool fibers are derived from nature, and as with all natural materials, there may be slight variations in texture and color between dye lots. If precise color matching is necessary, please contact our customer service department, and we will provide a sample from the actual production for your approval before shipment.

During the initial months of use, it is common for some pilling to occur. This is not a manufacturing defect but rather a typical characteristic of these fiber types. The amount of pilling will gradually decrease after several weeks of use and will not affect the rug's durability, appearance, or quality. Regular vacuuming not only cleans the rug but also helps restore the pile and improve its quality. Avoid using central vacuums or low-powered ones. It's also important to regularly rotate the rugs to ensure even exposure to light and wear across the entire surface. When furniture exerts pressure on the rug, consider using rug protection to prevent damage to the pile and preserve the overall appearance of the product. Regular cleaning is essential to maintain the appearance of your rug. Use a high-quality vacuum cleaner with at least 2000W of power and vacuum in the direction of the pile. All rugs should be cleaned regularly, with lighter rugs requiring more frequent cleaning than darker ones. Avoid steam cleaning or methods involving significant temperature increases. For rugs containing Tencel we highly recommend professional injection-extraction washing with low temperatures and low-pressure values. For deeper cleaning, please consult a specialized rug cleaning company.

Backing
The backing is made of polyester. Since it is used for the back side of the rugs there is no flame danger for backing as well. Polyester is a petroleum based material. This is as maximum eco-friendly as other petroleum based materials.

Extra information
Please do not store rolls packed longer than 3-4 weeks.
